

## Upgrade to SYNCHRO 4D from SYNCHRO Pro and Workgroup Project (SWP)

*SYNCHRO 4D Pro* has been released as a new desktop product in our construction cloud solution, which means that 4D planning, scheduling and visualisation have never been so collaborative or as affordable. *SYNCHRO 4D Pro* is included with a *SYNCHRO 4D* subscription.

*SYNCHRO 4D Pro* includes the capabilities of *SYNCHRO Pro* plus cloud storage for project data via *SYNCHRO Control*, enabling you to create 4D content, review models and 4D schedules using a web browser, and perform model-based progress updates with the *SYNCHRO Field* mobile app.

Best of all, you no longer need *SWP* because a *SYNCHRO Control* user can set up multiple cloudhosted projects for the price of a single subscription. *SYNCHRO 4D Pro* also includes the *Iray plugin* at no extra cost.

A *SYNCHRO 4D* subscription is the optimal path for customers wanting cloud collaboration for 4D models, since these capabilities are delivered as a SaaS capability compared with a separate, and expensive, cloud hosting environment.

### Why have prices increased for older SYNCHRO applications?

All future development will be on *SYNCHRO 4D* and on January 1 we raised the renewal subscription price for *SYNCHRO Pro* and *SWP* to reflect the extra work needed to maintain the legacy software, and the hosting costs for *SWP*. We will continue to support the legacy products in accordance with Bentley's Legacy Support Policy.

## What are the benefits of upgrading to a SYNCHRO 4D subscription?

- A *SYNCHRO 4D* subscription allows your entire project team to access the same construction digital twin from *SYNCHRO 4D Pro* (desktop), *SYNCHRO Control* (web), and *SYNCHRO Field* (mobile)
- *SYNCHRO 4D* includes *SYNCHRO Control* and *SYNCHRO Field* at no extra cost.
- *SYNCHRO Modeler* is included in the price, enabling you to create a construction model from a design model, and producing accurate, repeatable quantity-take offs while eliminating costly remodeling.
- Instant-on, secure cloud to enable the 4D digital twin as a single source of truth, with easy set up.
- Single sign-on for web, mobile and desktop.
- Comprehensive role-based access control to manage project permissions
- 4D web viewing with impressive performance in *SYNCHRO Control*, which means that *SYNCHRO OpenViewer* (on a BIM workstation) is no longer needed for anyone wanting to view 4D content. *Iray* is also included at no extra cost.
- Includes cloud collaboration for multiple projects at no extra cost, using *SYNCHRO Control*, compared with *SWP* that required a separate subscription for each project.
- Your *SYNCHRO 4D* subscription provides access to the full range of *SYNCHRO* services and applications at no extra cost, including the soon-to-be-released *SYNCHRO Cost* and *SYNCHRO Perform*.

Ready to test your *SYNCHRO* models in a browser? Register a free 30-day demo project at <https://construction.bentley.com>. Go to *Administrator > Import iModel* and create a new *iModel* by uploading your .sp file.

## How will this affect my current projects?

If you are using only *SYNCHRO Pro* then you can move to *SYNCHRO 4D* at any time. However, existing projects that are using *SYNCHRO Pro* and *SWP* should continue using the current software through to the end of the project. We do NOT recommend mid-project upgrades. If you do want to upgrade *SWP* to a *SYNCHRO Control* project, please contact [synchrosupport@bentley.com](mailto:synchrosupport@bentley.com) for advice. You can find more detailed information on the Bentley Communities site: [Migrating from the old SYNCHRO apps](#)

## How do I move to the latest software?

Simply contact your Account Manager at Bentley and they will do the rest.

## Have questions?

For help or advice about upgrading to the latest *SYNCHRO 4D* solution simply [contact us](#) and talk to one of our *SYNCHRO* specialists.
